

Stages of a human life

National Curriculum Statutory Requirements

KS1W4 - identifying and classifying

2C1 - notice that animals, including humans, have offspring which grow into adults

Outstanding Science Year 2 - Animals, including humans - OS2C001

Learning Objective

I can sequence the different stages of a human life.

Me:

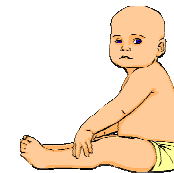

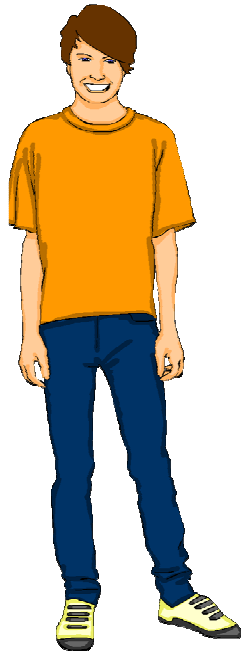

Teacher:

Growing and changing

Humans go through different stages of life as they grow. Some of these stages include **babies**, **toddlers**, **children**, **teenagers** and **adults**.

Activity

Cut out the pictures of people and their descriptions. Place the people in order of age, starting with youngest on the left. Paste them into the spaces provided. Match the descriptions to the pictures, or write your own descriptions.

Discussion

Can you estimate the ages of each of the people? As well as getting bigger, what other changes can you identify between the stages in a person's life?

Stages of a human life

Baby

I can crawl but I cannot walk. I am growing.

Adult

I go to university or work. I can have children of my own. I have finished growing.

Toddler

I can walk and talk. I will soon be ready to go to nursery. I am still growing.

Child

I can walk, talk and run. I go to primary school. I am still growing.

Teenager

I am getting taller and stronger. I go to secondary school. I am still growing.
