The next morning he discovered that penguins come from the South Pole. But how could he get there? He ran down to the harbour and asked the big ship to take them to the South Pole. But his voice was much too small to be heard over the ship's horn.

So together, he and the penguin would row to the South Pole. The boy took his rowboat out of the cupboard and they tested it for size and strength. They packed everything they would need... and together they pushed the rowboat out to sea.

They rowed south for many days and nights with the boy telling stories all the way.
